EXPERIENCE

Trustless Work

Jun. 2024 – Present

Web3 Developer, Co-founder

San Francisco, CA

- Co-founded a blockchain platform, defining product strategy and roadmap.
- Developed backend APIs to interact with Stellar smart contracts, enabling secure on-chain operations.
- Designed and implemented smart contracts in Rust using Soroban SDK.

Morphosis Blocks

Sep. 2023 – Present

Full Stack Developer

San José, CR

- Improved website performance and SEO by implementing structured metadata and optimizing frontend architecture.
- Built and optimized database systems for financial transaction analysis, reducing data processing time by 40%.
- Automated cryptocurrency fee calculations and transaction validation workflows using n8n, reducing manual workload by 30%.

PROJECTS

Tokenized Credit Platform (Pilot)

- Led the development and mentorship of a blockchain-based private credit platform on Stellar, delivering an end-to-end pilot for a real-world microfinance use case.
- Designed and implemented a multi-contract architecture (Escrow, Token, Token Sale, Vault, Deployer) in Rust using Soroban SDK, enabling tokenized investments, fund distribution, and ROI claims.
- Built a full-stack system (NestJS + Next.js) with secure transaction flows (XDR pattern), supporting campaign management, investor participation, and on-chain financial operations.

Stock Analyzer

- Integrated SEC EDGAR API to extract and transform financial data (10-K, 10-Q) into structured metrics (revenue, EPS, debt ratios).
- Built an AI-powered analysis feature using OpenAI's GPT-4.1, enabling on-demand fundamental stock analysis with an in-memory TTL cache layer to minimize redundant API calls.

EDUCATION

Hispanoamericana University

2024 (In process of completion)

Bachelor's Degree

San José, CR

- **Relevant courses::** Data structure, Database, Systems analysis, Operating systems, Systems design, Project formulation and techniques, Application development.

SKILLS

Programming Languages: JavaScript, TypeScript, Rust, Solidity

Backend & Web: Node.js, NestJS, Express, GraphQL, REST APIs, Next.js

Databases & ORM: PostgreSQL, MongoDB, SQL, Supabase, TypeORM

Blockchain: Stellar (Soroban SDK), Smart Contracts (Rust)

AI & Automation: AI Agents, n8n workflows, CloudCode, LLM integration (OpenAI APIs, prompt engineering, tool calling)

DevOps & Tools: Docker, Git, GitHub

Frontend: React, Next.js, TailwindCSS

Soft Skills: Problem solving, Decision making, Adaptability, Time management, Communication, Teamwork
